

Meet Halfway

Find a convenient
place to meet up,
safely and securely

Lauren, Christine, Paul, Leith
CS 122, Winter 2016
Final Project Proposal

THE UNIVERSITY OF
CHICAGO

Meet Halfway makes it easy to find a
place to meet a friend (or stranger) that's
convenient for both of you

CHICAGO

- 
- A blurred, black and white photograph of a busy city street with many pedestrians walking. Tall buildings line the street, and the overall scene is out of focus to create a sense of motion.
- Choose your type of meeting place
 - Enter both of your locations and travel modes privately or publicly
 - Find a meeting place with roughly equal travel times

Meet Halfway

Meet Halfway helps Chicagoans find a place to meet that requires roughly equal travel times for both parties given two starting destinations, preferred modes of transit, and desired type of location.

[About](#) [Contact](#)

I'm starting from:

I'm getting there by:

I'd like to meet at:

☐ Bar

☐ Cafe

☐ Library

☐ Park

☐ Public Space

☐ Restaurant

☒ All

I'm meeting anonymously:

Meet Halfway

Meet Halfway helps Chicagoans find a place to meet that requires roughly equal travel times for both parties given two starting destinations, preferred modes of transit, and desired type of location.

[About](#) [Contact](#)

If you have or friend's address you can enter it now to find a suggested meeting point.

My friend is coming from:

My friend is getting there by:

OR

Send a link for someone else to enter their starting address and you both will receive the suggested meetup.

Click here to create a sharable link:

Meet Halfway

Here are our suggestions:

One

Two

Three

Four

Your estimated travel: 13 minutes

Bridgeport Coffee House

5030 S Cornell Ave

Chicago, IL 60615

(773)947-0348

6AM - 8PM

[Get directions!](#)

Given two addresses and modes of transit, identify a meeting area with roughly equal travel times for both users

Google Distance Matrix API

Lead: Christine

Given a destination area, identify businesses fitting user preferences within a certain radius

Google Places API/
Yelp API

Lead: Lauren

Design a user interface for inputting locations and preferences privately or publicly and display results

Django/Bootstrap
HTML/CSS/JS

Lead: Leith

Design a backend architecture that can handle html generation, request routing, unique URL generation, and meeting IDs

Django/SQLite3

Lead: Paul
